

CardioCycle SMART APP

Take Your Training To The Next Level

REAL-TIME MONITOR

CardioCycle smart app displays your real time breath rate and heart rate.

GET INSIGHTS INTO YOUR TRAINING LEVEL

CardioCycle smart app gives you deep insight into your true training by comprehensive exercise intensity assessment.

TRAIN WITH HEART RATE ZONE

CardioCycle smart app displays accurate real-time heart rate and heart rate zone data while you exercise.

LEGIBLE STATISTIC REPORTS

Detailed training data helps you stay on top of your progress goals and personal bests.

MANAGE EXERCISE LOAD

CardioCycle smart app measures the load you are putting on your body when you exercise and provides the insight you need to decide if you should pull back or go for it!

GET TO A NEW LEVEL

SenseON measures the long term improvements you are making to your cardiovascular fitness level by tracking resting heart rate and heart rate recovery on a regular basis. The measurements are done automatically in the background.

SenseON™

Precise On-Body Breath & Heart Fitness Tracker

FREE YOUR TRAINING

SenseON provides clinical grade Cardio-Pulmonary function tracking for accurate breath and heart rate monitoring. Besides, with intelligent algorithms, rich sports biometric data are given, like professional heart and respiration function metrics e.g., heart rate zones, HR recovery rate, heart-breathe rate ratio, and other quantitative training data such as calories, pace and cadence.

ACCURATE MONITOR

Experts know that if you want accurate monitoring of heart rate. The best place to do it is on the torso. Where the heart rate signal is strongest. The SenseON is applied to your chest or side where the super sensitive single lead BIPATM sensor captures a clear signal.

BREATH RATE

Let your respiration be your guide with SenseON. Seeing your breaths per minute in real time you'll be more aware of breathing slower giving you more energy to push yourself further every time.

WATERPROOF

The SenseON is encased in a durable biocompatible silicone housing for worry free use in the pool or open water while showering or under condition of extreme perspiration.

MARATHON BATTERY LIFE

Power through 2hrs-workouts up to 7 days. The charging suite extends battery life beyond 70 days.

SenseON™ is Better

IT JUST KNOWS

One of the best things about training with SenseON and CardioCycle Smart APP is that you can focus on your training and let the SenseON and software track your bio-signals and activity. There's no need to remember to push start or stop - it just knows!

RELIABLE COMMUNICATION

SenseON uses the industry standard Bluetooth LE to ensure reliable clear communication with smart phones and tablets so your data is constantly available and always so your data is constantly available and always accurate.

What does it track?

- BiPA™ Breath Rate
- BiPA™ Heart Rate & Zones
- HR Rate Recovery
- Breath Heart Rate Ratio
- Calories Burned
- Active Time
- Steps
- Cadence

How to use it?

1- shake SenseON to wake up it with purple LED flashing twice, then connect SenseON with CardioCycle App
2- put one piece of disposable Adhesive on the back of SenseON with their hook&loop sides

3- peel off the release paper on the disposable Adhesive
4- paste SenseON onto your torso around left-lower chest

Note: moisten electrodes with water when skin is very dry

SPECIFICATIONS

- **Connection Range**
10m in open space
- **Battery Life (Working)**
18 hours
- **Battery Life (Standby)**
96 hours
- **Charging Cycle**
30 minutes
- **Charging Case Capacity**
8 times full charging
- **SenseON Material**
Food grade silicone
- **Adhesive Material**
Professional water-proof Kinesio Tape
- **Adhesive Endurance**
3 hours for intense exercise
- **Protection Rate**
IP67
- **Sensor**
BiPA™ Bio-Sensor
- **Heart Rate Range**
40-200bpm
- **Heart Rate Accuracy**
±1bpm
- **Breath Rate Range**
10-60bpm
- **Breath Rate Accuracy**
±1bpm
- **Wireless Connection**
Bluetooth 4.0
